

Ultra pure PFA tube and weld fittings

Construction

The fitting bodies are made of PFA, the union nuts are made of PFA, PVDF or CPFA. All parts are manufactured in a cleanroom and provide the highest chemical resistance.

Features

- Tube and weld fittings
- Available sizes 1/4", 3/8", 1/2", 3/4", 1", 1 1/4", 1 1/2" and 2"

Advantage

- For leak free performance with minimum dead space in ultra pure fluid applications
- High reliability, even in high vibration applications
- Simple installation, i. a. as they can be accessed from the side during assembly
- 1000 different versions for the most frequently used connections
- GEMÜ "Space saver" (space-saving connection option) also available

Technical data

Working medium

Corrosive, inert, gaseous and liquid media which have no negative impact on the physical and chemical properties of the fitting material.

Information

Maximum pressure capabilities of the different **FlareStar®** union nuts are listed below.

(Tubing ratings are included as a reference).

The ratings are provided as a guide in system design. The component with the lowest maximum pressure rating determines the maximum system pressure rating.

Max. operating pressure [PSI (kPA)]

Technical data

Pressure vs. temperature diagram

Information

The diagram/measured values are based on water at ambient temperature, standard tube (wall thickness for 1/4" - 0.047", for other sizes 0.062") and PFA components.

Warning:

Ratings are determined using a safety factor of 1.5.

Dimensions (tolerances)

Tolerances

- The **CleanStar**® plastic parts are manufactured to DIN 16901-140.
- Space saver - flare connections may have tolerances of $\pm 2.5\text{mm}$ per connection to the total length of fitting.
- The maximum gap (B) between the tubing end and the end of the fitting should be 2 mm to 3.8 mm. Once tube is assembled the maximum gap could be bigger than the original value.
- Tolerances for weld connections are not available due to variances in welding techniques and equipment.

Overlap dimensions and thread sizes of flare connections

Tube size	Thread designation	Standard	A mm (inch)
1/4"	1/2"-20-UNF	ANSI B 1.1	7.0 (0.27")
3/8"	5/8"-20-UN	ANSI B 1.1	10.0 (0.39")
1/2"	3/4"-20-UNEF	ANSI B 1.1	12.0 (0.47")
3/4"	1"-20-UNEF	ANSI B 1.1	14.0 (0.55")
1"	1 7/16"-12-UN	ANSI B 1.1	14.0 (0.55")
1 1/4"	1 3/4"-8-UN	ANSI B 1.1	18.0 (0.71")

Order data

Order example	F	MC	75	12 8	30	HP
F* denotes this is a FlareStar ® fitting	F					
MC* This combination of letters denotes the fitting style (e.g. ("MC" = Male connector, tube to pipe)		MC				
75** Union nut material: PVDF (code 75) PFA (code 77) CPFA (code 73)			75			
12 8 Connection*** Size (Type)				12 8		
30 Fitting body material: PVDF (code 20) PFA (code 30) PTFE (code 26)					30	
HP High Purity						HP

* denotes the fitting type: see Contents on pages 2 and 3

** with PVDF nut = code 75 (standard), with PFA nut = code 77, with CPFA nut = code 73

*** Connection: If it is a tube to pipe connector, the first number denotes the tube connection size and the second number denotes the pipe thread size.
