

# Válvula de mariposa Metal

## Construcción

GEMÜ Victoria® es una válvula de mariposa centrada con una junta de cierre elastomérica. Está disponible en los diámetros nominales DN 25-600 y en distintas versiones de cuerpo tales como tipo Wafer, Lug y en U.

La válvula de mariposa está disponible con diferentes variantes de actuador:

GEMÜ 487 con palanca manual o engranaje, GEMÜ 481 con actuador neumático, GEMÜ 488 con actuador todo/nada o actuador de regulación.

## Características

- Apta para fluidos gaseosos y líquidos en el sector industrial, así como para el tratamiento de aguas
- Longitud de montaje según ISO 5752/20, EN 558-1/20, API 609 categoría A
- Brida de montaje según EN ISO 5211
- Presión máx. de trabajo: 3/10/16 bar
- Estándar de conexión: PN 10, PN 16, ASME B16.5 cl. 150
- Norma de uso: EN 593
- Comprobación de hermeticidad según EN 12266-1/P12, índice de fuga A
- La válvula de mariposa cumple con los requisitos de seguridad establecidos en el Anexo I de la directiva europea de equipos a presión 2014/68/UE para fluidos de los grupos 1 y 2
- Disponible con diseño opcional de acuerdo a la normativa ATEX y sin sustancias que perturban la humectación de la laca

## Ventajas

- Diseño de asiento avanzado, incluso en caso de diámetros nominales grandes
- Amplia variedad de aplicaciones gracias a la diversidad de materiales
- Construcción modular
- Montaje sencillo
- Pares de apriete reducidos
- Homologación para agua potable (DVGW, ACS, Belgaqua)
- Recubrimiento del cuerpo según la norma ISO 12944-6 C5
- Puede utilizarse también en aplicaciones costeras y de mar adentro, así como en edificios expuestos a condiciones permanentes de condensación y contaminación

GEMÜ 480

GEMÜ 487

GEMÜ 481

GEMÜ 488

**GEMÜ® Victoria®**  
**480, 481, 487, 488**

## Datos técnicos

### Fluido de trabajo

Fluidos gaseosos y líquidos que no influyan negativamente en las propiedades mecánicas y químicas del material de la junta y del disco.

### Temperatura admisible del fluido de trabajo

-10-150 °C, según el material de la junta de cierre

Otras temperaturas bajo petición

No se admiten golpes de ariete

### Condiciones ambientales

Temperatura ambiente admitida -10-70 °C

## Presión máxima del fluido de trabajo

| PS     | Fluidos grupo 1 |              | Fluidos grupo 2 |              |
|--------|-----------------|--------------|-----------------|--------------|
|        | Gases           | Líquidos     | Gases           | Líquidos     |
| 16 bar | DN 25 - 200     | DN 25 - 200  | DN 25 - 200     | DN 25 - 200  |
| 10 bar | DN 250 - 350    | DN 250 - 600 | DN 250 - 500    | DN 250 - 600 |
| 6 bar  | -               | -            | DN 600          | -            |
| 3 bar  | DN 200 - 350    | DN 200 - 600 | DN 200 - 600    | DN 200 - 600 |

Si se utiliza (montaje) como válvula final de línea, la presión máx. de trabajo para líquidos es DN 50-200 10 bar  
DN 250 - 600 6 bar

Si se utiliza como válvula final de línea, debe colocarse una contrabrida.

## Par de apriete/valores Kv

| DN  | PS<br>[bar] | Par de apriete*<br>[Nm] | Valores Kv [m³/h] en el ángulo de abertura |      |       |      |       |       |       |       |
|-----|-------------|-------------------------|--------------------------------------------|------|-------|------|-------|-------|-------|-------|

Con un ángulo de abertura inferior a 30° no se debe ajustar.

\* Fluido de trabajo: agua (20 °C), y condiciones de trabajo óptimas

En el caso de válvulas de mariposa con junta pegada, los pares de apriete deben multiplicarse por 1,3.

En caso de válvulas de mariposa con junta de EPDM (código T), los pares de apriete deben multiplicarse por 1,44.

## Datos técnicos - GEMÜ 481 con actuador neumático tipo ADA/ASR

### Fluido de pilotaje

Aire comprimido filtrado, seco; fluido no corrosivo

### Rango de temperatura

De -30 a +100 °C; otras temperaturas bajo petición

### Presión de control

6 a 8 bar

### Ángulo de giro

Ajustable  $\pm 5^\circ$  (85°-95°)

90°

## 12 Datos de pedido - GEMÜ 481 con actuador neumático tipo ADA/ASR

### 12 Tamaño del actuador\*

Presión de trabajo: 16 bar (véanse los datos de pedido; presión de trabajo, código 3)

## Datos técnicos - GEMÜ 481 con actuador neumático tipo DR/SC

### Fluido de pilotaje

Aire comprimido filtrado, seco; fluido no corrosivo

### Rango de temperatura

De -40 a +80 °C; otras temperaturas bajo petición

### Presión de control

6 a 8 bar

### Ángulo de giro

Ajustable 20° (75°-95°)

90°

## 12 Datos de pedido - GEMÜ 481 con actuador neumático tipo DR/SC

### 12 Tamaño del actuador\*

Presión de trabajo: 16 bar (véanse los datos de pedido; presión de trabajo, código 3)

## Datos técnicos de actuadores eléctricos GEMÜ

| Temperatura ambiente mín./máx. |
|--------------------------------|
| De -10 a +60° C                |

| Protección eléctrica según EN 60529 |
|-------------------------------------|
| IP 65                               |

| Peso                                 |         |
|--------------------------------------|---------|
| Versión de actuador 1006, 2006, 1015 | 0,9 kg  |
| Versión de actuador 2015             | 1,2 kg  |
| Versión de actuador 3035             | 2,4 kg  |
| Versión de actuador 2070             | 4,6 kg  |
| Versión de actuador 4100/4200        | 11,0 kg |
| Versión de actuador 6400             | 14,0 kg |

| Directivas                                    |
|-----------------------------------------------|
| Directiva sobre máquinas 98/37/CE, Anexo II B |
| Directiva CEM 89/336/CEE                      |

| Particularidades                    |
|-------------------------------------|
| Mando manual de emergencia de serie |

| Alimentación de tensión                     |                                           |
|---------------------------------------------|-------------------------------------------|
| Tensión nominal                             | 12 V, 24 V DC/12 V, 24 V, 120 V, 230 V AC |
| Frecuencia nominal (con tensión nominal AC) | 50/60 Hz                                  |
| Tolerancia de tensión eléctrica             | +10 %/-15 %                               |

| Tiempos de acción              |             |
|--------------------------------|-------------|
| Versión de actuador 1006, 2006 | aprox. 4 s  |
| Versión de actuador 1015, 2015 | aprox. 11 s |
| Versión de actuador 2070, 3035 | aprox. 15 s |
| Versión de actuador 4100       | aprox. 20 s |
| Versión de actuador 4200       | aprox. 16 s |
| Versión de actuador 6400       | aprox. 29 s |

| Toma de potencia y de corriente [W] |         |         |                |          |                |          |                |          |                |          |              |

## Datos técnicos para actuadores eléctricos J+J

### Temperatura ambiente mín./máx.

De -20 a +70 °C

### Protección eléctrica según EN 60529

IP 67

### Particularidades

Mando manual de emergencia de serie

### Peso

|                                 |        |
|---------------------------------|--------|
| Versión de actuador J3C20       | 1,8 kg |
| Versión de actuador J3C35       | 1,9 kg |
| Versión de actuador J3C55       | 2,3 kg |
| Versión de actuador J3C85       | 3,0 kg |
| Versión de actuador J3C14/J3C30 | 5,2 kg |

### Alimentación de tensión

#### Tensión nominal

Versión J3C14/30 24 V AC/DC (0/+5 %)

Versión J3C20/35/55/85 24-240 V AC/DC (± 0 %)

Todos los diseños 85-240 V AC/DC (0/+ 5 %)

Frecuencia nominal (con tensión nominal AC) 50/60 Hz

Tiempo de funcionamiento 75 %

### Tiempos de acción (± 10 %)

| Versión de actuador | 24-240 V AC/DC<br>Código U5 | 24 V, 85-240 V AC/DC<br>Código C5, S5 |
|---------------------|-----------------------------|---------------------------------------|
| J3C20               | 10 s                        | -                                     |
| J3C35               | 10 s                        | -                                     |
| J3C55               | 14 s                        | -                                     |
| J3C85               | 30 s                        | -                                     |
