

Virtual Factory Tour

Take a Virtual Factory Tour to discover cutting-edge production plants and forward-thinking assembly areas, and get an exclusive peak behind the scenes in the world of GEMÜ.

What can you expect?

Accompanied by your personal guide, you will discover the world of GEMÜ on a virtual 3D tour. See for yourself the incredible variety of products from GEMÜ and follow the journey of a valve from the incoming goods department through Quality Assurance and on to assembly and finally dispatch. You have the opportunity to discuss, ask questions and gain fascinating insights – just as if you were there at the GEMÜ plant in person.

Such insights include the manufacture of stainless steel valves in Criesbach, assembly in the GEMÜ Production and Logistics Centre and cleanroom manufacturing in Emmen. The Virtual Factory Tour is gradually being expanded to include even more GEMÜ sites.

Interested?

Then simply get in touch with your contact person in Sales to request a Virtual Factory Tour. Your contact will connect you virtually with our specialists so that you can then experience the digital tour.
