

GEMÜ 1436 cPos

Intelligent positioner and integrated process controller

Features

- Digital inputs (option) for variable function control for automation
- Fieldbus interfaces, e.g. Profibus DP, Profinet and DeviceNet (option)
- No air consumption when idle
- Simple mounting to various actuators
- Access rights via different user levels
- High flow rate

Description

The GEMÜ 1436 cPos digital electro-pneumatic positioner has an optional integrated process controller to control pneumatically operated process valves with single acting or double acting linear or quarter turn actuators. When using the optional process controller, the signals from the sensors (e.g. flow, level, pressure, temperature) are detected and the media adjusted according to the specified set value. GEMÜ 1436 cPos has a robust aluminium housing with protected operating keys and an LCD display which allows the product to be individually adapted to complex control tasks. With additional equipment, the positioner can be used directly in fieldbus environments.

Technical specifications

- **Ambient temperature:** 0 to 60 °C
- **Operating pressure :** 1.5 to 7 bar
- **Mode of action:** Double acting | Single acting
- **Flow rate:** 100 NI/min | 172 NI/min | 84 NI/min
- **Measuring range:** Max. 30 mm, linear | Max. 50 mm, linear | Max. 75 mm, linear | Max. 90°, radial
- **Supply voltage:** 24 V DC
- **Electrical connection types:** M12 connector
- **Conformity:** EAC

Technical data depends on the respective configuration

Product description

Item	Name	Materials
1	Operating and display elements, membrane keypad	Polyester film with acrylic glass
2	Housing cover	PSU
3	Housing base	PP 30
4	Mounting kit, valve-specific	Materials, parts valve-specific

Functions

- Positioner and process controller combined and synchronized with each other
- Automatic or manual optimizing initialization
- Multiple point calibration for optimized valve control
- Diagnostics, alarm messages
- Operation possible when controller is active
- 4 parameter sets can be saved and reloaded
- 3 user levels (access authorization)
- Operating hours counter, event list (for details see operating instructions)
- Digital inputs (option) for variable function control for automation
- Alphanumeric display, 2 lines with 16 digits each, with background light
- Parameterization on the device through context-sensitive menu selection and help texts (optionally PC-supported via web browser)

GEMÜ CONEXO

The interaction of valve components that are equipped with RFID chips and an associated IT infrastructure actively increase process reliability.

Thanks to serialization, every valve and every relevant valve component such as the body, actuator or diaphragm, and even automation components, can be clearly traced and read using the CONEXO pen RFID reader. The CONEXO app, which can be installed on mobile devices, not only facilitates and improves the "installation qualification" process, but also makes the maintenance process much more transparent and easier to document. The app actively guides the maintenance technician through the maintenance schedule and directly provides him with all the information assigned to the valve, such as test reports, testing documentation and maintenance histories. The CONEXO portal acts as a central element, helping to collect, manage and process all data.

For further information on GEMÜ CONEXO please visit:

www.gemu-group.com/conexo

Ordering

GEMÜ Conexo must be ordered separately with the ordering option "CONEXO".

Installing the RFID chip

Availability

Action	Flow rate

Code 01: 2 additional digital inputs 24 V DC

Order data

The order data provide an overview of standard configurations.

Please check the availability before ordering. Other configurations available on request.

Note: Pneumatic connecting components (union and compressed air tube) for the connection between the process valve and positioner are included with each positioner.

Note: A valve specific mounting kit is required for assembly. For designing the mounting kit, the valve type, nominal size, control function and actuator size must be stated.

Technical data

Medium

Working medium:	Compressed air and inert gases
Dust content:	$\leq 10 \text{ mg/m}^3$ /particle size $\leq 40 \text{ }\mu\text{m}$ (class 7)
Pressure dew point:	Class 4, max. pressure dew point +3 °C
Oil content:	Class 4, max. oil concentration 5 mg/m^3 Quality classes to DIN ISO 8573-1

Temperature

Ambient temperature:	0 – 60 °C 0 – 50 °C (Profinet code PN)
Storage temperature:	0 – 60 °C

Product conformity

EMC Directive:	2014/30/EU
	Technical standards used:
Interference emission:	DIN EN 61000-6-4 (09/2011) DIN EN 61326-1(industry) (01/2006)
Interference resistance:	DIN EN 61000-6-2 (03/2006) DIN EN 61326-1(industry) (10/2006)

Pressure

Operating pressure:	1.5 – 7 bar The applied pressure must not exceed the maximum control pressure of the process valve.
----------------------------	--

Flow rate:	Flow rate (code)	Specification l / min ¹⁾	Specification NI / min ²⁾
	Code 01	150 l/min	84 NI/min
	Code 02	200 l/min	100 NI/min
	Code 03 (Booster)	300 l/min	172 NI/min
1) Reference condition: 6 → 0 bar at 25 °C			
2) Reference condition: 6 → 5 bar at 25 °C			

Air consumption:	0 NI/min (when idle)
-------------------------	----------------------

Mechanical data

Installation position:	Optional
Protection class:	IP 65 acc. to EN 60529
Weight:	600 g

Travel sensor: Integrated for direct mounting

	Linear design			Quarter turn design
Detection range:	0–30 mm	0–50 mm	0–75 mm	Angle of rotation 0 - 93°
Operating range:	0–30 mm	0–50 mm	0–75 mm	Angle of rotation 0 - 93°
Minimum travel sensor change:	≥ 3 % (only relevant for initialization)			
Resistance R:	3 kΩ	5 kΩ	5 kΩ	3 kΩ
Correlation - Travel sensor¹⁾ spindle/valve position	Retracted (top) ± 100% (valve open)			90° ± 100% (valve open)
	Extended (bottom) ± 0% (valve closed)			0° ± 0% (valve closed)

1) Type of design code 6960: Inversed mode of action compared with description (Travel sensor signal inversed). For valves with inverted correlation.

Acoustic data

Noise emission: > 80 dB (A)

Electrical data

Power supply

Supply voltage: 24 V DC (-5/+10%)

Power consumption:

	Order variant			
	Without fieldbus (code 000)	Profinet fieldbus (code PN)	Profibus fieldbus (code DP)	DeviceNet fieldbus (code DN)
Single acting:	≤ 4.5 W	≤ 8.6 W	≤ 5.2 W	≤ 4.5 W
Double acting / Booster:	≤ 6.2 W	≤ 10.7 W	≤ 7.1 W	≤ 6.4 W
plus in each case:	max. 24 W for active digital outputs with max. on-load current	-		

Reverse battery protection: Yes

Duty cycle: Continuous duty

Electrical protection class: III

Analogue inputs

Set value / actual value:

- Set value and actual value input are galvanically isolated from the supply voltage
- Set value and actual value input are **not** galvanically isolated from the actual value output
- Set value and actual value input are **not** galvanically isolated from each other

Set value input: 0/4 - 20 mA (adjustable)

Process actual value input: 0/4 - 20 mA (adjustable)
Only for device version code PA01

Input type:	passive
Input resistance:	120 Ω (+ approx. 0.7 V voltage drop due to reverse battery protection)
Accuracy/linearity:	$\leq \pm 0.3\%$ of full flow
Temperature drift:	$\leq \pm 0.3\%$ of full flow
Resolution:	12 bit
Reverse battery protection:	Yes
Overload proof:	Yes (up to ± 24 V DC)

Analogue output

Actual value output:	4–20 mA
Output type:	Active
Load resistor:	Max. 600 Ω
Accuracy:	$\leq \pm 1\%$ of full flow
Temperature drift:	$\leq \pm 0.5\%$ of full flow
Resolution:	12 bit
Short-circuit proof:	Yes
Overload proof:	Yes (up to ± 24 V DC)

Digital input

Note: The additional digital inputs 1 / 2 must be ordered via the ordering option "Option". In the fieldbus versions, the function of the digital inputs can be used as standard via the bus communication.

Inputs:	1 / 2
Function:	selectable via software (DigIn 1; DigIn2; DigInW; DigInX) (reference: GND X1:3)
Input voltage:	24 V DC
Input current:	2.5 mA DC at 24 V DC
High level:	>14 V DC
Low level:	< 8 V DC

Digital output

Switching outputs:	K1 / K2
Function:	Can be selected using software
Switching voltage:	Supply voltage
On-load current:	max. 0.5 A

Technical data

Drop voltage:	Max. 2.5 V DC at 0.5 A
Type of contact:	PNP
Pull-Down resistance:	120 k Ω
Short-circuit proof:	Yes
Overload proof:	Yes (up to ± 24 V DC)

Travel sensor input (for travel length code S01 – remote potentiometer)

Note:	Travel sensor input galvanically isolated from supply voltage, not galvanically isolated from the set value/actual value inputs and actual value output.
Input voltage range:	0 to U_{P+}
Supply voltage U_{P+}:	Typically 10 V DC
Resistance range of remote potentiometers:	1 to 10 k Ω
Input resistance:	620 k Ω
Accuracy/linearity:	$\leq \pm 0.3\%$ of full flow
Temperature drift:	$\leq \pm 0.3\%$ of full flow
Resolution:	12 bit
Short-circuit proof:	Yes
Overload proof:	Yes (up to ± 24 V DC)

Positioner data

Note:	The following diagram is valid for valves with a standard assignment of the spindle position to the valve position. (See section "Mechanical data, correlation between travel sensor spindle/valve position")
--------------	--

Control diagram: Default setting / The control characteristic is adjustable.

During initialization, the 1436 cPos positioner automatically detects the control function of the valve and adjusts itself by default so that the valve is closed when the signal is 0/4 mA.*

The assignment can subsequently be changed using parameters.

* For double-acting actuators, depends on the pneumatic actuator

Positioner

System deviation (dead zone): 1 % default setting
 ≥ 0.1 % (adjustable)
 ≤ 2.0 % (preset, K-no. 2442)
 ≤ 5.0 % (preset, K-no. 2443)

Parameterisation: adjustable

Initialization: automatic or manual

Close tight function: option

Process controller

Option only for device version code PA01

Controller type: Continuous controllers

PID parameters: adjustable

Process actual value input: 0/4 - 20 mA (adjustable)

Interfaces

	RS232	Profibus DP	DeviceNet	Profinet
Function	Parameterization via web browser	Parameterization/process data		
Transmission rates	-	9.6k / 19.2k / 45.45k / 93.75k / 500k / 1.5M / 3M / 6 M / 12 M baud**	125k / 250k / 500k baud	100M baud***

** Auto Baud: The device has an Auto Baud function and therefore automatically adjusts to the bus-side configuration of the transmission rate.

*** Two switches are connected in series internally between connection X1 and X3.

Communication lead time during operation in line structure (connection X1 and X3) therefore double that of a "standard two-port device".

Actual value > 20.0 mA (range adjustable from 0...22 mA under I Max X)*		

* only available for Device version code PA01

** Close = default setting

Mounting options

Mounting the positioner to linear actuators

Direct mounting

For direct mounting of the positioner on a valve with linear actuator, you need the following components

- GEMÜ 1436 positioner in travel sensor version code 030, 050 or 075 (dependent on the stroke of the valve used)
- GEMÜ 1436 S01 Z... valve-specific mounting kit for mounting the positioner

(At the time of ordering, state the valve type with nominal size and control function)

Remote mounting

For remote mounting of the positioner on a valve with linear actuator, you need the following components

- GEMÜ 1436 positioner in travel sensor version code S01 (remote potentiometer)
- Travel sensor GEMÜ 4232 ... 030, 050 or 075... 4001

(Travel sensor version dependent on the valve used; cable length dependent on the required distance between the valve and positioner)

- GEMÜ 4232 S01 Z... valve-specific mounting kit for mounting the travel sensor
- GEMÜ 1436 000 ZMP mounting bracket (optional) for fixing the positioner

(At the time of ordering, state the valve type with nominal size and control function and the required distance to the mounting location of the positioner)

By using remote mounting and additional, deviating components, the valve can also be used in potentially explosive areas (provided that this is approved). In this case, the positioner must be installed outside the potentially explosive area and the connection with the travel sensor established via safety barriers.

The electrical connection and the installation must be carried out in accordance with the specifications in the operating instructions.

Applicable area (zone) dependent on the type of ignition protection of the valve or travel sensor.

The following deviating, supplementary components are to be used for this type of operation:

- Travel sensor in explosion-protected design GEMÜ 4232 ... 030/050/075 ... 0000 ... X
Travel sensor version dependent on the valve used, cable length dependent on the distance between the critical (potentially explosive) and safe zone
- Connector between travel sensor and positioner, GEMÜ 1219000Z0300SG00M0M125A, order number: 88208779
- Safety barrier A two-channel, safety barrier P626, order number: 99014203 *
- Safety barrier B one-channel, safety barrier P630, order number: 99014207 *

* Alternative safety barriers with similar characteristics can be used on-site – technical properties available on request

Mounting the positioner to quarter turn actuators

Direct mounting

For direct mounting of the positioner on a valve with quarter turn actuator, you need the following components

- Positioner GEMÜ 1436 ... 090
- GEMÜ 1436 PTAZ ... 090 000 valve-specific mounting kit for mounting the positioner

(At the time of ordering, state the valve type with actuator flange size)

Remote mounting

For remote mounting of the positioner on a valve with quarter turn actuator, you need the following components

- GEMÜ 1436 positioner in travel sensor version code S01 (remote potentiometer)
- GEMÜ 4231...4001 travel sensor (cable length dependent on the required distance between the valve and positioner)
- 4231PTAZ... ..090 000 valve-specific mounting kit for mounting the travel sensor
- GEMÜ 1436 000 ZMP mounting bracket (optional) for fixing the positioner

(When ordering, specify the actuator flange size and the required distance to the mounting location of the positioner)

By using remote mounting and additional, deviating components, the valve can also be used in potentially explosive areas (provided that this is approved). In this case, the positioner must be installed outside the potentially explosive area and the connection with the travel sensor established via safety barriers.

The electrical connection and the installation must be carried out in accordance with the specifications in the operating instructions.

Applicable area (zone) dependent on the type of ignition protection of the valve or travel sensor.

The following deviating, supplementary components are to be used for this type of operation:

- GEMÜ 4231 ... 0000 travel sensor
cable length dependent on the required distance between critical (potentially explosive) and safe zone
- Connector between travel sensor and positioner, GEMÜ 1219000Z0300SG00M0M125A, order number: 88208779
- Safety barrier A two-channel, safety barrier P626, order number: 99014203 *
- Safety barrier B one-channel, safety barrier P630, order number: 99014207 *

* Alternative safety barriers with similar characteristics can be used on-site – technical properties available on request

Accessories

GEMÜ 1436 S02 Z

Connection kit

The 1436 S02 Z ... connection kit is used to electrically connect the GEMÜ 1436 cPos positioner to a control unit. The kit comprises pre-assembled cable connections with various connector plugs/sockets and suitable cables with selectable lengths or, alternatively, without a cable but with a threaded connection. The connectors for the 3 plugs of the GEMÜ 1436 cPos are included according to the ordering information. Specific connection kits are required for the fieldbus versions Profibus DP (code DP) and Profinet (code PN) (see ordering information).

The versions without fieldbus (code 000) and DeviceNet (code DN) use standard parts.

Designation	Connection type X1/X3, A-coded	Connection type X2, B-coded	Order number
1436S02Z00M000M0	X1/X3 angle, without cable	X2 angle, without cable	88249257
1436S02Z00M000Y0	X1/X3 angle, without cable	X2 Y cable and M12 socket without cable	88254410
