1 General information

1.1 Information

- The descriptions and instructions apply to the standard versions. For special versions not described in this document the basic information contained herein applies in combination with any additional special documentation.
- Correct installation, operation, maintenance and repair work ensure faultless operation of the product.
- Should there be any doubts or misunderstandings, the German version is the authoritative document.
- Contact us at the address on the last page for staff training information.
- A supplement to Directive 2014/34/EU (ATEX Directive) is included with the product, provided that it was ordered in accordance with ATEX.

1.2 Symbols used

The following symbols are used in this document:

Symbol	Meaning
●	Tasks to be performed
►	Response(s) to tasks
–	Lists

1.3 Definition of terms

Working medium

The medium that flows through the GEMÜ product.

Control function

The possible actuation functions of the GEMÜ product.

Control medium

The medium whose increasing or decreasing pressure causes the GEMÜ product to be actuated and operated.

1.4 Warning notes

Wherever possible, warning notes are organized according to the following scheme:

SIGNAL WORD	
Possible symbol for the specific danger	Type and source of the danger ►Possible consequences in case of non-compliance ●Measures for avoiding danger

Warning notes are always labelled with a signal word and sometimes also with a symbol for the specific danger.

The following signal words and danger levels are used:

 DANGER	
	Imminent danger! ► Non-observance can cause death or severe injury

 WARNING	
	Potentially dangerous situation! ► Non-observance can cause death or severe injury

 CAUTION	
	Potentially dangerous situation! ► Non-observance can cause moderate to light injury

NOTICE	
	Potentially dangerous situation! ► Non-observance can cause damage to property

The following symbols for the specific dangers can be used within a warning note:

Symbol	Meaning
	The equipment is subject to pressure!
	Corrosive chemicals!
	GEMÜ products without an actuating element!
	Hot plant components!
	Leakage!
	Maximum permissible pressure exceeded!
	Use as an end-of-line valve!
	Risk of crushing!

2 Safety information

The safety information in this document refers only to an individual product. Potentially dangerous conditions can arise in combination with other plant components, which need to be considered on the basis of a risk analysis. The operator is responsible for the production of the risk analysis and for compliance with the resulting precautionary measures and regional safety regulations.

The document contains fundamental safety information that must be observed during commissioning, operation and maintenance. Non-compliance with these instructions may cause:

- Personal hazard due to electrical, mechanical and chemical effects
- Hazard to nearby equipment
- Failure of important functions
- Hazard to the environment due to the leakage of dangerous materials

The safety information does not take into account:

- Unexpected incidents and events, which may occur during installation, operation and maintenance
- Local safety regulations which must be adhered to by the operator and by any additional installation personnel

Prior to commissioning:

1. Transport and store the product correctly.
2. Do not paint the bolts and plastic parts of the product.
3. Carry out installation and commissioning using trained personnel.
4. Provide adequate training for installation and operating personnel.
5. Ensure that the contents of the document have been fully understood by the responsible personnel.
6. Define the areas of responsibility.
7. Observe the safety data sheets.
8. Observe the safety regulations for the media used.

During operation:

9. Keep this document available at the place of use.
10. Observe the safety information.
11. Operate the product in accordance with this document.
12. Operate the product in accordance with the specifications.
13. Maintain the product correctly.
14. Do not carry out any maintenance work and repairs not described in this document without consulting the manufacturer first.

In cases of uncertainty:

15. Consult the nearest GEMÜ sales office.

3 Product description

3.1 Construction

Item	Name	Materials
1	Body	SG iron 5.3106, epoxy coated (RAL 5021)
2	Shaft	1.4021
3	Axis	1.4021
4	Disc	Various materials (see order data)
5	Liner	Various materials (see order data)
6	Threaded plug	1.4021
7	O-ring	NBR
8	Support rings	PTFE
9	Hexagon head bolts	Stainless steel A2-70
0	Earthing kit for Ex version	
0-1	Cable lug (Ex version)	
0-2	Stranded wire (Ex version)	
10	Manual actuator	Aluminium, polyurethane coated GG25, polyurethane coated

3.2 Description

The GEMÜ R487 Victoria soft seated metal butterfly valve is manually operated. It has a hand lever or gearbox depending on customer requirements. The butterfly valve is available in nominal sizes DN 50 to 300 and in standard installation lengths ISO 5752/20 | EN 558-1/20 | API 609 category A (DIN 3202 K1) in wafer and lug body versions.

3.3 Function

The product controls a flowing medium by manual operation.

3.4 Product label

The product label is located on the valve body. Product label data (example):

The month of manufacture is encoded in the traceability number and can be obtained from GEMÜ. The product was manufactured in Germany.

The operating pressure stated on the product label applies to a media temperature of 20 °C. The product can be used up to the maximum stated media temperature. You can find the pressure/temperature correlation in the technical data.

4 Actuator assignment

4.1 Latching hand lever assignment, aluminium (AHL)

Operating pressure	DN	Actuator flange	Designation	Code
10 bar, 16 bar	25 – 50	F05	AHL.F0509.200	AHL09
	65, 80	F05	AHL.F0511.200	AHL11
	100	F07	AHL.F0514.200	AHL14
	125, 150	F07	AHL.F0717.270	AHL17
	200*	F10	AHL.F1022.340	AHL22
3 bar	250*	F10	AHL.F1017.340	AHL22

*For manual operation, we recommend a gearbox for these nominal sizes

4.2 Latching hand lever assignment, stainless steel (VHL)

Operating pressure	DN	Actuator flange	Designation	Code
10 bar, 16 bar	25 – 100*	F05	VHL F0514. 195	VHL14
	80 – 150	F07	VHL F0717. 267	VHL17
	200	F10	VHL F1022. 330	VHL22

*DN 80, 100 not for lug bodies

4.3 Continuously adjustable hand lever assignment, aluminium (SAHL)

Operating pressure	DN	Actuator flange	Designation	Code
3 bar, 6 bar, 10 bar, 16 bar	25 – 50	F05	SAHL.F0509.200	SAHL09
	65, 80	F05	SAHL.F0511.200	SAHL11
	100	F05	SAHL.F0514.200	SAHL14
	125 – 150	F07	SAHL.F0717.270	SAHL17

4.4 Handwheel with gearbox assignment

Operating pressure	DN	Actuator flange	Designation	Code
3 bar, 10 bar, 16 bar	25 – 50	F05	GB23205F05-F07D9 PS100	GB232
	65, 80	F05	GB23205F05-F07D11 PS100	GB232
	100	F05	GB23205F05-F07D14 PS100	GB232
	125	F05	GB23206F05-F07D17 PS100	GB232
	150	F05	GB23206F05-F07D17 PS160	GB232
	200 – 300	F07	GB23208F07-F10D22 PS200	GB232
	350	F10	GB23214F10-F12D27 SG500	GB232
	400	F14	GB23214 F14D36 SG500	GB232
	450, 500	F10	GB880NF10-F14D36 SG800	GB880N
	600	F12	GB1250NF12-F16D46 SG700	GB1250N

5 Correct use

WARNING

Improper use of the product!

- ▶ Risk of severe injury or death
- ▶ Manufacturer liability and guarantee will be void.
- Only use the product in accordance with the operating conditions specified in the contract documentation and in this document.

NOTICE

Explosion protection (ATEX)

- ▶ The product is free from potential ignition sources and does not fall under the ATEX Directive 2014/34/EU. It is suitable for use in potentially explosive areas. See the manufacturer's declaration.

The product is designed for installation in piping systems and for controlling a working medium.

- Use the product in accordance with the technical data.

6 Order data

Other configurations available on request. Please check the availability with GEMÜ before ordering.

Products ordered with **bold marked ordering options** are so-called preferred series. Depending on the nominal size, these are available more quickly.

Order codes

1 Type	Code
Butterfly valve, manually operated, body with C5-M coating (min. 250 µm) and integrated leakage groove, blow-out proof shaft with dust protection, multiple bearings through PTFE bushing, multiple sealing system with insertion slope, material easy to read when installed	R487

7 Technical data

7.1 Medium

Working medium: Gaseous and liquid media which have no negative impact on the physical and chemical properties of the disc and seat material.

For special version for oxygen (code O): Only gaseous oxygen.

7.2 Temperature

Media temperature: -10 – 160 °C

Depending on the liner and disc material or the type of liner fixing

----- Not recommended for permanent temperature

FKM material not suitable for water/steam applications above 100 °C, Observe Pressure/Temperature diagram.

FKM material not suitable for water/steam applications above 100 °C, Observe Pressure/Temperature diagram.

For the medium gaseous oxygen (special version code O): Media temperature max. 100 °C.

Ambient temperature: -10 – 70 °C

Storage temperature: -20 – 40 °C

7.3 Pressure

Operating pressure: DN 25–200: 0–16 bar
DN 250–600: 0–10 bar
Observe pressure/temperature diagram

Use as an end-of-line valve:

DN 25–200: 10 bar

DN 250–600: 6 bar

For the medium gaseous oxygen (special version code O): Operating pressure limited in accordance with product label data.

Vacuum: Can be used up to a vacuum of 800 mbar (abs) with replaceable liner or with bonded liner up to a vacuum of 2 mbar (abs) through a leakage rate at 10^{-3} [mbar l/sec]
These values apply to room temperature and air. The values may deviate for other media and other temperatures.

Kv values in m³/h

When the opening angle is below 30° no regulation should be made!

7.4 Product conformity

Pressure equipment standards:

ASME GEMÜ B31.3

2014/68/EU

The butterfly valve fulfils the technical requirements of pressure equipment categories I and II and can be used under the following conditions.

Areas of use for R487 butterfly valve as in-line valve (classification as per Pressure Equipment Directive 2014/68/EC Article 4 and Annex II)				
	Media of fluid group 1 (dangerous)		Media of fluid group 2 (other)

6	DN25 – DN350	DN25 – DN600	DN25 – DN600	DN25 – DN600
3	DN25 – DN350	DN25 – DN600	DN25 – DN600	DN25 – DN600

* Limit of the technical specification

When used as an end-of-line valve, a mating flange must be fitted.

Special conditions of use as an end-of-line valve: See section 7.3.

Food:

FDA

Regulation (EC) No. 1935/2004

Drinking water:

DVGW

ACS

WRAS

Belgaqua

NSF

Oxygen:

Testing of the seal material based on DIN EN 1797 and ISO 21010:2017 (special version code O)

Gas:

DVGW

Ship approval:

DNV GL

Explosion protection:

The product does not fall within the scope of Directive 2014/34/EU, as it does not have its own potential source of ignition. This is based on Section 38 of the ATEX Guideline (5th edition, April 2024).

TA Luft (German Clean Air Act):

The product meets the following requirements under the max. permissible operating conditions:

- Tightness or compliance with the specific leak rate within the sense of TA-Luft as well as VDI 2440
- Compliance with the requirements in accordance with DIN EN ISO 15848-1, Table C.2, Class BH

9 Manufacturer's information

9.1 Delivery

- Check that all parts are present and check for any damage immediately upon receipt.

The product's performance is tested at the factory. The scope of delivery is apparent from the dispatch documents and the design from the order number.

9.2 Transport

1. Only transport the product by suitable means. Do not drop. Handle carefully.
2. After the installation dispose of transport packaging material according to relevant local or national disposal regulations / environmental protection laws.

9.3 Storage

1. Store the product free from dust and moisture in its original packaging.
2. Avoid UV rays and direct sunlight.
3. Do not exceed the maximum storage temperature (see chapter "Technical data").
4. Do not store solvents, chemicals, acids, fuels or similar fluids in the same room as GEMÜ products and their spare parts.
5. Close the compressed air connections with protection caps or sealing plugs.

10 Installation in piping

10.1 Preparing for installation

 WARNING	
	The equipment is subject to pressure! ▶ Risk of severe injury or death ● Depressurize the plant or plant component. ● Completely drain the plant or plant component.

 WARNING	
	Corrosive chemicals! ▶ Risk of caustic burns ● Wear appropriate protective gear. ● Completely drain the plant.

 WARNING	
	GEMÜ products without an actuating element! ▶ Risk of severe injury or death ● Do not apply pressure to GEMÜ products installed in piping without an actuating element.

 CAUTION	
	Hot plant components! ▶ Burns ● Only work on plant that has cooled down. ● Wear protective gear.

 CAUTION	
	Leakage! ▶ Emission of dangerous materials ● Provide for precautionary measures against exceeding the maximum permissible pressure that may be caused by pressure surges (water hammer).

 CAUTION	
	Maximum permissible pressure exceeded! ▶ Damage to the product! ● Provide for precautionary measures against exceeding the maximum permissible pressure that may be caused by pressure surges (water hammer).

 CAUTION	
	Use as an end-of-line valve! ▶ Damage to the GEMÜ product ● When using the GEMÜ product as an end-of-line valve, a mating flange must be fitted.

 CAUTION	
	Risk of crushing! ▶ Risk of severe injury ● Before performing any work on the GEMÜ product, depressurize the plant.

 CAUTION	
	Risk of crushing! ▶ Severe injury due to crushing of the fingers between the valve body and butterfly disc. ● Depressurize the plant before performing any work on the butterfly valve, and unscrew the control medium line(s) of the butterfly valve. ● Ensure that the butterfly disc is in the respective end position (closed for NC or open for NO). ● Do not reach into the crushing area between the valve body and butterfly disc.

NOTICE

Suitability of the product!

- The product must be appropriate for the piping system operating conditions (medium, medium concentration, temperature and pressure) and the prevailing ambient conditions.
1. Ensure the product is suitable for the relevant application.
 2. Check the technical data of the product and the materials.
 3. The external pressure must not exceed 1 bar PSa.
 4. Pressure surges are not permissible. The plant operator must plan appropriate precautionary measures.
 5. The pressure differential must not exceed the maximum operating pressure.
 6. The butterfly valve may only be used with a bonded liner up to 0.2 bar abs.
 7. The plant operator must ensure fire protection is in place. Regularly service electrical equipment designed for preventive fire protection in compliance with DIN VDE 0100-610 (IEC/EN 61557).
 8. Keep appropriate tools ready.
 9. Use appropriate protective gear as specified in plant operator's guidelines.
 10. Observe appropriate regulations for connections.
 11. Installation work must be performed by trained personnel.
 12. Shut off plant or plant component.
 13. Secure the plant or plant component against recommissioning.
 14. Depressurize the plant or plant component.
 15. Completely drain the plant or plant component and allow it to cool down until the temperature is below the media vaporization temperature and cannot cause scalding.
 16. Decontaminate, rinse and ventilate the plant or plant component properly.
 17. Lay piping so that the product is protected against transverse and bending forces, and also from vibrations and tension.
 18. Only install the product between matching aligned pipes (see following chapters).
 19. Please note the flow direction (see chapter "Installation location").
 20. Please note the installation position (see chapter "Installation location").
 21. The valve is not designed for loads caused by earthquakes.
 22. The plant operator must take into account loads and torques for the bearing elements.
For valves with a nominal size > DN xx, suitable bearing elements may need to be used. Design weights and dimensions can be found in the datasheets.
 23. Match the coloured marking of the liner to the material (see table):

Material	Code	Colour
EPDM	EL	-
EPDM (drinking water)	WL	Orange
EPDM white	ML	-
EPDM-HT	TL	Grey
NBR	NL	Blue
FPM	VL	Yellow
Flucast AB/P	FL	Red

10.2 Installation location

1. You can choose the installation position of the GEMÜ product. If media is contaminated and $DN \geq 300$, install GEMÜ R487 horizontally, so that the lower edge of the disc opens in-line with flow direction.

2. You can choose the flow direction of the GEMÜ product.
3. Arrange the bolt holes of piping and valves so that they are not on the two main axes (but rather symmetrical to them).

4. The inside diameter of the piping must match the nominal diameter of the GEMÜ product.
5. The diameter of the pipe flanges should be, in compliance with the respective nominal size, between "D max" and "D min" (see table).

DN	D max	D min
25	32.0	13.0
40	47.0	29.0
50	60.0	33.0
65	74.0	53.0
80	96.0	72.0
100	113.0	92.0
125	140.0	118.0
150	169.0	146.0
200	223.0	197.0
250	273.0	247.0
300	323.0	297.0
350	363.0	335.0
400	417.0	384.0
450	465.0	432.0
500	518.0	485.0
600	618.0	580.0

Dimensions in mm

10.3 Installation of the standard version

⚠ CAUTION

Damage!

- Before carrying out any welding on the piping, remove the butterfly valve to prevent damage to the liner.

1. Shut off plant or plant component.
2. Secure against recommissioning.
3. Depressurize the plant or plant component.
4. Completely drain the plant or plant component and allow it to cool down until the temperature is below the media vaporization temperature and cannot cause scalding.
5. Decontaminate, rinse and ventilate the plant or plant component properly.
6. Check flange faces for potential damage.
7. Remove any rough areas (rust, dirt, etc.) from the pipe flanges.
8. Sufficiently spread the pipe flanges.
9. Do not use any flange seals.
10. Clamp the butterfly valve **1** centrally between the pipes with flanges **2** and **3**.

11. Slightly open the butterfly valve **1**. The disc must not project from the body.
12. Insert bolts **4** in all holes in the flange.

13. Slightly tighten the bolts **4** and nuts **5** diagonally.
14. Fully open the disc and check the alignment of the piping.
15. Tighten the nuts **5** diagonally until the flanges fit tightly on the body.
Observe the permissible tightening torque of the bolts (see "Mechanical data").

10.4 Installation of the Ex version

1. Install the butterfly valve, see chapter "Installation of the standard version".
2. Connect the earthing cable of the butterfly valve to the earth terminal of the plant.
3. Test the resistance between the earthing cable and actuator shaft (value <106 Ω, typical value <5 Ω).

11 Commissioning

⚠ CAUTION

Leakage!

- ▶ Emission of dangerous materials
- Provide for precautionary measures against exceeding the maximum permissible pressure that may be caused by pressure surges (water hammer).

⚠ CAUTION

Use as an end-of-line valve!

- ▶ Damage to the GEMÜ product
- When using the GEMÜ product as an end-of-line valve, a mating flange must be fitted.

⚠ CAUTION

Cleaning agent!

- ▶ Damage to the GEMÜ product
- The plant operator is responsible for selecting the cleaning material and performing the procedure.

1. Check the tightness and the function of the product (close and reopen the product).
2. Flush the piping system of new plant and following repair work (the product must be fully open).
⇒ Harmful foreign matter has been removed.
⇒ The product is ready for use.
3. Commission the product.
4. Commissioning of actuators in accordance with the enclosed instructions.

⚠ WARNING

Corrosive chemicals!

- ▶ Risk of caustic burns
- Wear appropriate protective gear.
- Completely drain the plant.

12 Operation

⚠ CAUTION

Incorrect operation of the hand lever!

- Damage to the hand lever
- Do not open or close the hand lever with a fast movement.
- Do not extend the hand lever.

12.1 Operating hand lever AHL / DAHL

Fig. 1: Construction of hand lever AHL / DAHL

Fig. 2: Detail of latch setting of hand lever AHL / DAHL

1. Press locking device **6** upwards.
2. Move the hand lever **1** to the desired position and latch.

12.2 Operating hand lever SAHL

Fig. 3: Construction of hand lever SAHL

Fig. 4: Detail of latch setting of hand lever SAHL

1. Release locking device **6**.
 - ⇒ Turn the locking device anticlockwise: Hand lever loose.
2. Move the hand lever **1** to the desired position and fix the position with locking device **6**.
 - ⇒ Turn the locking device **6** clockwise: Hand lever fixed.

13 Troubleshooting

Error	Possible cause	Troubleshooting
The product does not open or does not open fully	Actuator defective	Replace the actuator
	Operating pressure too high	Operate the product with operating pressure specified in datasheet
	Foreign matter in the product	Remove and clean the product
	The actuator design is not suitable for the operating conditions	Use an actuator that is designed for the operating conditions
	Flange dimensions do not comply with specifications	Use correct flange dimensions
	Inside diameter of piping too small for nominal size of product	Install product with suitable nominal size
The product is leaking downstream (does not close or does not close fully)	Operating pressure too high	Operate the product with operating pressure specified in datasheet
The product does not close or does not close fully	The actuator design is not suitable for the operating conditions	Use an actuator that is designed for the operating conditions
	Foreign matter in the product	Remove and clean the product
Connection between valve body and piping leaking	Incorrect installation	Check installation of valve body in piping
	Threaded connections / unions loose	Tighten threaded connections / unions
	Sealing material faulty	Replace sealing material
Valve body leaking	Valve body leaking or corroded	Check valve body for damage, replace valve body if necessary
	Incorrect installation	Check installation of valve body in piping
Increased switching noises when opening the product	When the disc is in the closed position, this may cause a higher breakaway torque	Use the product regularly

14 Inspection and maintenance

⚠ WARNING

The equipment is subject to pressure!

- ▶ Risk of severe injury or death
- Depressurize the plant or plant component.
- Completely drain the plant or plant component.

NOTICE

Use of incorrect spare parts!

- ▶ Damage to the GEMÜ product
- ▶ The manufacturer liability and guarantee will be void.
- Use only genuine parts from GEMÜ.

⚠ CAUTION

Hot plant components!

- ▶ Burns
- Only work on plant that has cooled down.
- Wear protective gear.

NOTICE

Exceptional maintenance work!

- ▶ Damage to the GEMÜ product
- Any maintenance work and repairs not described in these operating instructions must not be performed without consulting the manufacturer first.

The operator must carry out regular visual examinations of the products, depending on the operating conditions and the potentially hazardous situations, in order to prevent leakage and damage.

1. Have servicing and maintenance work performed by trained personnel.
2. Wear appropriate protective gear as specified in the plant operator's guidelines.
3. Disconnect from power supply.
4. Shut off plant or plant component.
5. Secure plant or plant component against recommissioning.
6. Depressurize the plant or plant component.
7. Actuate products that are always in the same position four times a year.

14.1 Cleaning the product

- Clean the product with a damp cloth.
- Do **not** clean the product with a high pressure cleaning device.

14.2 Ex version

- Test the resistance between the earthing cable and actuator shaft at least once a year.
(Value <106 Ω, typical value <5 Ω)

14.3 Removing the butterfly valve from the piping

⚠ WARNING

The equipment is subject to pressure!

- ▶ Risk of severe injury or death
- Depressurize the plant or plant component.
- Completely drain the plant or plant component.

⚠ WARNING

Corrosive chemicals!

- ▶ Risk of caustic burns
- Wear appropriate protective gear.
- Completely drain the plant.

⚠ CAUTION

Hot plant components!

- ▶ Burns
- Only work on plant that has cooled down.
- Wear protective gear.

1. Maintenance work must only be performed by trained personnel.
2. Use appropriate protective gear as specified in plant operator's guidelines.
3. Move the butterfly valve to a slightly open position. The disc must not project from the body.
4. Loosen and remove flange bolts and nuts.
5. Spread the piping flanges.
6. Remove the butterfly valve.

14.4 Presetting the butterfly valves

1. Move the butterfly disc to the closed position.
2. Determine the L1 and L2 dimensions and use them to calculate the L dimension.
3. The butterfly disc must be turned out of the seal seat in the closed position. (Anticlockwise)
4. Comply with the L dimension when setting.
5. If readjustment is necessary, open the butterfly disc and adapt the presetting.
6. Repeat steps 1 to 4 until the L dimension has been reached.
7. In the open position, the disc must be set to 90°, otherwise the Kv value will be reduced.

DN	L [mm]	W [°]
25	2.0	9.1
40	2.0	5.7
50	2.0	4.6
65	2.0	3.5
80	2.0	2.9
100	2.0	2.3
125	2.0	1.8
150	7.7	3.0
200	8.9	2.6
250	10.0	2.3
300	11.0	2.1
350	11.8	1.9
400	12.6	1.8
450	13.4	1.7
500	14.1	1.6
600	15.5	1.5

15 Spare parts

15.1 Ordering spare parts

NOTICE

Use of incorrect spare parts!

- ▶ Damage to the GEMÜ product
- ▶ The manufacturer liability and guarantee will be void.
- Use only genuine parts from GEMÜ.

When ordering spare parts, please provide the following information:

1. Complete order code
2. Item number
3. Traceability number
4. Name of spare part
5. Area of use (medium, temperatures and pressures)

15.2 Lug

Item	Name	Order designation
11	Liner	R480...SLN...
4	O-ring	R480...SLN...
8	O-ring	R480...SLN...
7	Support ring	R480...SLN...
2	Bush	R480...SVK...
9	Bush	R480...SVK...
10	Hexagon head bolt with pin	R480...SVK...
5	Axis	R480...SSH...
6	Shaft	R480...SSH...
12	Butterfly disc	R480...SDS...
1	Coated metallic valve body	
3	Threaded plug	

15.3 Wafer

Item	Name	Order designation
11	Liner	R480...SLN...
4	O-ring	R480...SLN...
8	O-ring	R480...SLN...
7	Support ring	R480...SLN...
2	Bush	R480...SVK...
9	Bush	R480...SVK...
10	Hexagon head bolt with pin	R480...SVK...
5	Axis	R480...SSH...
6	Shaft	R480...SSH...
12	Butterfly disc	R480...SDS...
1	Coated metallic valve body	
3	Threaded plug	

15.4 Replacement of spare parts

NOTICE

- Assembly instructions for replacing the wearing parts are included with every wearing parts kit.

15.4.1 Replacing the SVK wearing parts kit

15.4.1.1 Lug

1. Loosen and remove the hexagon head bolt **10** with pin.
2. Remove the support ring **7**, O-ring **8** and bush **9**.
3. Pull the shaft **6** out upwards.
4. Undo the threaded plug **3**, remove the O-ring **4** and bush **2**.
5. Pull the axis **5** out downwards.
6. Assemble the wearing parts kit in reverse order.

15.4.1.2 Wafer

1. Loosen and remove the hexagon head bolt **10** with pin.
2. Remove the support ring **7**, O-ring **8** and bush **9**.
3. Pull the shaft **6** out upwards.
4. Undo the threaded plug **3**, remove the O-ring **4** and bush **2**.
5. Pull the axis **5** out downwards.
6. Assemble the wearing parts kit in reverse order.

15.4.2 Replacing the SDS wearing parts kit

1. Disassemble the SVK wearing parts kit (see chapter "Replacing the SVK wearing parts kit").
2. Remove the butterfly disc **12**.
3. Assemble the wearing parts kit in reverse order.

15.4.3 Replacing the SLN wearing parts kit

1. Disassemble the SVK wearing parts kit (see chapter "Replacing the SVK wearing parts kit").
2. Disassemble the SDS wearing parts kit (see chapter "Replacing SDS wearing parts kit").
3. Remove the liner **11**.
4. Assemble the wearing parts kit in reverse order.

16 Disposal

1. Pay attention to adhered residual material and gas diffusion from penetrated media.
2. Dispose of all parts in accordance with the disposal regulations/environmental protection laws.

17 Returns

Legal regulations for the protection of the environment and personnel require that the completed and signed return delivery note is included with the dispatch documents. Returned goods can be processed only when this note is completed. If

no return delivery note is included with the product, GEMÜ cannot process credits or repair work but will dispose of the goods at the operator's expense.

1. Clean the product.
2. Request a return delivery note from GEMÜ.
3. Complete the return delivery note.
4. Send the product with a completed return delivery note to GEMÜ.

18 EU Declaration of Conformity in accordance with 2014/68/EU (Pressure Equipment Directive)

EU Declaration of Conformity

in accordance with 2014/68/EU (Pressure Equipment Directive)

We, the company

GEMÜ Gebr. Müller Apparatebau GmbH & Co. KG
Fritz-Müller-Strasse 6–8
74653 Ingelfingen
Germany

hereby declare under our sole responsibility that the below-mentioned product complies with the regulations of the above-mentioned Directive.

Product: GEMÜ R487
Product name: Manually operated butterfly valve
Notified body: TÜV Rheinland Industrie Service GmbH
Am Grauen Stein 1
51105 Cologne, Germany
ID number of the notified body: 0035
No. of the QA certificate: 01 202 926/Q-02 0036
Conformity assessment procedure(s) applied: Module H
The following harmonized standards (or parts thereof) have been applied: EN 593:2017

Other applied technical standards / Remarks:

- DIN EN ISO 5211; DIN EN 558; AD 2000

Use of the product in category III in accordance with Pressure Equipment Directive 2014/68/EU and use with unstable gases are not permissible.

M. Barghoorn
Head of Global Technics
Ingelfingen, 21/02/2024
