

THE MULTI-FUNCTIONAL VALVE ACTUATION

GEMÜ 44A0

PRODUCT DESCRIPTION

The multi-functional valve actuation GEMÜ 44A0 controls or regulates pneumatic process valves with a single-acting linear actuator. Among other features, it offers contactless position detection, an integrated sensor system and state-of-the-art interfaces – including a GEMÜ App connection.

AREAS OF APPLICATION

Biotechnology
industry

Pharmaceutical
industry

Cosmetics

Foodstuffs &
beverages

Specify the desired variant at the time of ordering: Combi switchbox or positioner

SIMPLE INSTALLATION, COMMISSIONING AND MAINTENANCE

- Uniform mounting parts reduce installation time
- Self-initialization and intuitive fault analysis using the GEMÜ App
- Automatic end position readjustment increases process reliability

CONDITION MONITORING

- Integrated sensor system for predictive maintenance
- Longer service life due to anomaly detection
- Reduced external sensor system

COMPACT AND ROBUST CONSTRUCTION

- Space-saving and easy to clean
- Robust and clean design for safe operation even under harsh conditions
- Long service life due to wear-free, contactless position detection

INTUITIVE OPERATING CONCEPT

- Display and operation on the valve itself
- Fast parameterization using the GEMÜ App; also possible offline
- IO-Link and ASi-5 for simple system integration

AVAILABLE FOR DIAPHRAGM, GLOBE OR TANK BOTTOM VALVES
